# Definitions

*Warranted* specifications describe the performance of a model under stated operating conditions and are covered by the model warranty. *Warranted* specifications account for measurement uncertainties, temperature drift, and aging. *Warranted* specifications are ensured by design or verified during production and calibration.

*Characteristics* describe values that are relevant to the use of the model under stated operating conditions but are not covered by the model warranty.

- *Typical* specifications describe the performance met by a majority of models.
- *Nominal* specifications describe an attribute that is based on design, conformance testing, or supplemental testing.
- Measured specifications describe the measured performance of a representative model.

Specifications in this document are Typical unless otherwise noted.

# Conditions

Specifications are valid under the following conditions unless otherwise noted.

- All filter settings
- All impedance selections
- Sample clock set to 1 GS/s
- Real-Time Interleaved Sampling (TIS) mode provides a 2 GS/s real-time sample rate for a single channel
- The module is warmed up for 15 minutes at ambient temperature
- Calibration cycle is maintained
- The PXI/PCI chassis fan speed is set to HIGH, the foam fan filters are removed if present, and the empty slots contain chassis slot blockers and filler panels. For more information about cooling, refer to the *Maintain Forced-Air Cooling Note to Users*.

### Onboard Clock (Internal VCSO)

Sample rate range	
Real-time sampling (single shot) <sup>14</sup>	15.26 kS/s to 1 GS/s
TIS <sup>15</sup> mode (single shot)	2 GS/s (single channel only)
Random interleaved sampling (RIS) mode <sup>16</sup>	2 GS/s to 20 GS/s in increments of 1 GS/s (repetitive waveforms only)
Timebase accuracy	
Not phase-locked to Reference clock	$\pm 30$ ppm within $\pm 3$ °C of external calibration temperature, plus an additional $\pm 7$ ppm per °C outside of $\pm 3$ °C of external calibration temperature, warranted
Phase-locked to Reference clock	Equal to the Reference clock accuracy <sup>17</sup>
Sample clock delay range	±1 Sample clock period
Sample clock delay/adjustment resolution	≤5 ps
External Sample Clock	

Sources	PFI 0 (front panel SMB connector)	
Frequency range <sup>18</sup>	350 MHz to 1 GHz	
Duty cycle tolerance	45% to 55%	

<sup>&</sup>lt;sup>13</sup> Internal Sample clock is locked to the Reference clock or derived from the onboard VCSO.

<sup>&</sup>lt;sup>14</sup> Divide by n decimation used for all rates less than 1 GS/s.

<sup>&</sup>lt;sup>15</sup> TIS is a type of real-time sampling that is sometimes called ping-pong.

<sup>&</sup>lt;sup>16</sup> RIS is a type of equivalent-time sampling.

<sup>&</sup>lt;sup>17</sup> Refer to your chassis specifications for the Reference clock accuracy.

<sup>&</sup>lt;sup>18</sup> Divide by *n* decimation available where  $1 \le n \le 65,535$ . For more information about the Sample clock and decimation, refer to the *NI High-Speed Digitizers Help*.

# Calibration

### **External Calibration**

External calibration calibrates the VCSO and the voltage reference. All calibration constants are stored in nonvolatile memory.

<sup>&</sup>lt;sup>25</sup> Single-record mode and multiple-record mode.

<sup>&</sup>lt;sup>26</sup> It is possible to exceed these numbers if you fetch records while acquiring data. For more information, refer to the *High-Speed Digitizers Help*.

### Self-Calibration

Self-calibration is done on software command. The calibration corrects for gain, offset, triggering, and timing errors for all input ranges.

## **Calibration Specifications**

Interval for external calibration	2 years
Warm-up time	15 minutes

# Software

### **Driver Software**

Driver support for the PXI-5152 was first available in NI-SCOPE 3.2.

NI-SCOPE is an IVI-compliant driver that allows you to configure, control, and calibrate the PXI-5152. NI-SCOPE provides application programming interfaces for many development environments.

# **Application Software**

NI-SCOPE provides programming interfaces, documentation, and examples for the following application development environments:

- LabVIEW
- LabWindows<sup>TM</sup>/CVI<sup>TM</sup>
- Measurement Studio
- Microsoft Visual C/C++
- .NET (C# and VB.NET)

# Interactive Soft Front Panel and Configuration

The NI-SCOPE Soft Front Panel (SFP) allows interactive control of the PXI-5152.

Interactive control of the PXI-5152 was first available in NI-SCOPE SFP version 3.2. The NI-SCOPE SFP is included on the NI-SCOPE media.

NI Measurement Automation Explorer (MAX) also provides interactive configuration and test tools for the PXI-5152. MAX is included on the NI-SCOPE media.

# **TClk Specifications**

You can use the NI TClk synchronization method and the NI-TClk driver to align the Sample clocks on any number of supported devices, in one or more chassis. For more information about TClk synchronization, refer to the *NI-TClk Synchronization Help*, which is located within the *NI High-Speed Digitizers Help*. For other configurations, including multichassis systems, contact NI Technical Support at *ni.com/support*.

# Intermodule SMC Synchronization Using NI-TClk for Identical Modules

Synchronization specifications are valid under the following conditions:

- All modules are installed in one NI PXI-1042 chassis
- The NI-TClk driver is used to align the Sample clocks of each module.
- All parameters are set to identical values for each module.
- Modules are synchronized without using an external Sample clock.
- Sample clock set to 1 GS/s and all filters are disabled.

**Note** Although you can use NI-TClk to synchronize non-identical SMC-based modules, these specifications apply only to synchronizing identical modules.

# **Compliance and Certifications**

### Safety

This product is designed to meet the requirements of the following electrical equipment safety standards for measurement, control, and laboratory use:

- IEC 61010-1, EN 61010-1
- UL 61010-1, CSA C22.2 No. 61010-1

**Note** For UL and other safety certifications, refer to the product label or the *Online Product Certification* section.

### Electromagnetic Compatibility

This product meets the requirements of the following EMC standards for electrical equipment for measurement, control, and laboratory use:

- EN 61326-1 (IEC 61326-1): Class A emissions; Basic immunity
- EN 55011 (CISPR 11): Group 1, Class A emissions
- EN 55022 (CISPR 22): Class A emissions
- EN 55024 (CISPR 24): Immunity
- AS/NZS CISPR 11: Group 1, Class A emissions
- AS/NZS CISPR 22: Class A emissions
- FCC 47 CFR Part 15B: Class A emissions
- ICES-001: Class A emissions

**Note** In the United States (per FCC 47 CFR), Class A equipment is intended for use in commercial, light-industrial, and heavy-industrial locations. In Europe, Canada, Australia, and New Zealand (per CISPR 11), Class A equipment is intended for use only in heavy-industrial locations.

**Note** Group 1 equipment (per CISPR 11) is any industrial, scientific, or medical equipment that does not intentionally generate radio frequency energy for the treatment of material or inspection/analysis purposes.

**Note** For EMC declarations, certifications, and additional information, refer to the *Online Product Certification* section.

# CE Compliance $C \in$

This product meets the essential requirements of applicable European Directives, as follows:

- 2014/35/EU; Low-Voltage Directive (safety)
- 2014/30/EU; Electromagnetic Compatibility Directive (EMC)

## **Online Product Certification**

Refer to the product Declaration of Conformity (DoC) for additional regulatory compliance information. To obtain product certifications and the DoC for this product, visit *ni.com/ certification*, search by model number or product line, and click the appropriate link in the Certification column.

### Environmental Management

NI is committed to designing and manufacturing products in an environmentally responsible manner. NI recognizes that eliminating certain hazardous substances from our products is beneficial to the environment and to NI customers.

For additional environmental information, refer to the *Minimize Our Environmental Impact* web page at *ni.com/environment*. This page contains the environmental regulations and directives with which NI complies, as well as other environmental information not included in this document.
