NI PXI/PCI-5412 Specifications

14-Bit 100 MS/s Arbitrary Waveform Generator

このドキュメントには、日本語ページも含まれています。

This document lists specifications for the NI PXI/PCI-5412 arbitrary waveform generator. Unless otherwise noted, the following conditions were used for each specification:

- Interpolation set to maximum allowed factor for a given sample rate.
- Signals terminated with 50 Ω .
- Low-gain amplifier path set to 2 Vpk-pk, and high-gain amplifier path set to 12 Vpk-pk.
- Sample clock set to 100 megasamples per second (MS/s).

Specifications describe the warranted, traceable product performance over ambient temperature ranges of 0 °C to 55 °C, unless otherwise noted.

Typical values describe useful product performance beyond specifications that are not covered by warranty and do not include guardbands for measurement uncertainty or drift. Typical values may not be verified on all units shipped from the factory. Unless otherwise noted, typical values cover the expected performance of units over ambient temperature ranges of 23 ± 5 °C with a 90% confidence level, based on measurements taken during development or production.

Nominal values (or supplemental information) describe additional information about the product that may be useful, including expected performance that is not covered under specifications or typical values. Nominal values are not covered by warranty.

Specifications are subject to change without notice. For the most recent NI 5412 specifications, visit ni.com/manuals.

To access all the NI 5412 documentation, navigate to **Start**»All **Programs**»National **Instruments**»NI-FGEN»Documentation.

Caution The protection provided by this product may be impaired if it used in a manner not specified in this document.

Hot Surface If the NI 5412 has been in use, it may exceed safe handling temperatures and cause burns. Allow the NI 5412 to cool before removing it from the chassis.

Note NI PXI-5412 modules of revision B or later are equipped with a modified PXI Express-compatible backplane connector. This modified connector allows the NI PXI-5412 to be installed in hybrid slots in a PXI Express chassis. To determine the revision of an NI PXI-5412 module, read the label on the underside of the NI PXI-5412. The label lists an assembly number of the format 192274x-01, where *x* is the revision.

TClk Specifications

National Instruments TClk synchronization method and the NI-TClk instrument driver are used to align the Sample clocks on any number of SMC-based modules in a chassis. For more information about TClk synchronization, refer to the *NI-TClk Synchronization Help*, which is located within the *NI Signal Generators Help*.

- Specifications are valid for any number of PXI modules installed in one NI PXI-1042 chassis.
- All parameters set to identical values for each SMC-based module.
- Sample Clock set to 100 MS/s, Divide-by-*N*, and all filters are disabled.
- For other configurations, including multichassis systems, contact NI Technical Support at ni.com/support.

Note Although you can use NI-TClk to synchronize nonidentical modules, these specifications apply only to synchronizing identical modules.

Specification	Value	Comments		
Intermodule SMC Synchronization Using NI-TClk for Identical Modules (Typical)				
Skew	500 ps	Caused by clock and analog path delay differences. No manual adjustment performed.		
Average Skew After Manual Adjustment	<10 ps	For information about manual adjustment, refer to the Synchronization Repeatability Optimization topic in the NI-TClk Synchronization Help. For additional help with the adjustment process, contact NI Technical Support at ni.com/ support.		
Sample Clock Delay/Adjustment Resolution	≤10 ps	—

Arbitrary Waveform Generation Mode

Specification	Value			Comments
Memory Usage	The NI 5412 uses the Synchronization and Memory Core (SMC) technology in which waveforms and instructions share onboard memory. Parameters, such as number of segments in sequence list, maximum number of waveforms in memory, and number of samples available for waveform storage, are flexible and user defined.			_
Onboard Memory Size	8 MB standard: 8,388,608 bytes	32 MB option: 33,554,432 bytes	256 MB option: 268,435,456 bytes	_
Output Modes	Arbitrary waveform mode and arbitrary sequence mode			_
Arbitrary Waveform Mode	5	ne set of wavefor	single waveform is rms stored in onboard	_

Specification	Value			Comments	
Arbitrary Sequence Mode	In arbitrary sequence mode, a sequence directs the NI 5412 to generate a set of waveforms in a specific order. Elements of the sequence are referred to as segments. Each segment is associated with a set of instructions. The instructions identify which waveform is selected from the set of waveforms in memory, how many loops (iterations) of the waveform are generated, and at which sample in the waveform a marker output signal is sent.			_	
Minimum Waveform Size (Samples)	Trigger Mode	Arbitrary Waveform Mode	Arbitrary Sequence Mode	The <i>Minimum</i> <i>Waveform Size</i> is sample rate	
	Single	16	16	dependent in arbitrary	
	Continuous	16	96 at >50 MS/s	sequence mode.	
			32 at \leq 50 MS/s

	8 MB Standard	32 MB Option	256 MB Option	All trigger modes except
Arbitrary Waveform Mode, Maximum Waveform Memory	4,194,176 samples	16,777,088 samples	134,217,600 samples	where noted.
Arbitrary Sequence Mode, Maximum Waveform Memory	4,194,120 samples	16,777,008 samples	134,217,520 samples	Condition: One or two segments in a sequence.
Arbitrary Sequence Mode, Maximum Waveforms	65,000 Burst trigger: 8,000	262,000 Burst trigger: 32,000	2,097,000 Burst trigger: 262,000	Condition: One or two segments in a sequence.
Arbitrary Sequence Mode, Maximum Segments in a Sequence	104,000 Burst trigger: 65,000	418,000 Burst trigger: 262,000	3,354,000 Burst trigger: 2,090,000	Condition: Waveform memory is <4,000 samples.

Specification	Value	Comments
Self-Calibration	An onboard, 24-bit ADC and precision voltage reference are used to calibrate the DC gain and offset. The self-calibration is initiated by the user through the software and takes approximately 75 seconds to complete.	_
External Calibration	External calibration calibrates the VCXO, voltage reference, DC gain, and offset. Appropriate constants are stored in nonvolatile memory.	Also known as factory calibration.
Calibration Interval	Specifications valid within two years of external calibration.	_
Warm-up Time	15 minutes	—

Power

Specification	Normal Operation	Overload Operation	Comments
Total Power	22 W	26 W	All values are typical. Overload operation occurs when CH 0 is shorted to ground.

Specification	Value	Comments
Driver Software	NI-FGEN is an IVI-compliant driver that allows you to configure, control, and calibrate the NI 5412. NI-FGEN provides application programming interfaces for many development environments.	_
Application Software	 NI-FGEN provides programming interfaces for the following application development environments: LabVIEW LabWindows[™]/CVI[™] Measurement Studio Microsoft Visual C++ .NET Microsoft Visual C/C++ Microsoft Visual Basic 	
Interactive Control and Configuration Software	The FGEN Soft Front Panel supports interactive control of the NI 5412. The FGEN Soft Front Panel is included on the NI-FGEN driver DVD. Measurement & Automation Explorer (MAX) provides interactive configuration and test tools for the NI 5412. MAX is also included on the NI-FGEN DVD. You can use the NI 5412 with NI SignalExpress.	_

NI PXI-5412 Environment

Note To ensure that the NI PXI-5412 cools effectively, follow the guidelines in the *Maintain Forced-Air Cooling Note to Users* included in the NI 5412 kit.

Specifications	Value	Comments
Operating Temperature	0 °C to +55 °C in all NI PXI chassis except the following:	—
	0 °C to +45 °C when installed in an NI PXI-101x or NI PXI-1000B chassis.	
	Meets IEC 60068-2-1 and IEC 60068-2-2.

Compliance and Certifications

Safety

This product meets the requirements of the following standards of safety for electrical equipment for measurement, control, and laboratory use:

- IEC 61010-1, EN 61010-1
- UL 61010-1, CSA 61010-1

Note For UL and other safety certifications, refer to the product label or the *Online Product Certification* section.

Electromagnetic Compatibility (EMC)

This product meets the requirements of the following EMC standards for electrical equipment for measurement, control, and laboratory use:

- EN 61326-1 (IEC 61326-1): Class A emissions, Basic immunity
- EN 55011 (CISPR 11): Group 1, Class A emissions
- AS/NZS CISPR 11: Group 1, Class A emissions
- FCC 47 CFR Part 15B: Class A emissions
- ICES-001: Class A emissions

Note In the United States (per FCC 47 CFR), Class A equipment is intended for use in commercial, light-industrial, and heavy-industrial locations. In Europe, Canada, Australia, and New Zealand (per CISPR 11), Class A equipment is intended for use only in heavy-industrial locations.

Note Group 1 equipment (per CISPR 11) is any industrial, scientific, or medical equipment that does not intentionally generate radio frequency energy for the treatment of material or inspection/analysis purposes.

Note For the standards applied to assess the EMC of this product, refer to the *Online Product Certification* section.

CE Compliance $\mathbf{C} \in \mathbf{C}$

This product meets the essential requirements of applicable European Directives as follows:

- 2014/35/EU; Low-Voltage Directive (safety)
- 2014/30/EU; Electromagnetic Compatibility Directive (EMC)

Online Product Certification

To obtain product certifications and the DoC for this product, visit ni.com/certification, search by model number or product line, and click the appropriate link in the Certification column.

Environmental Management

NI is committed to designing and manufacturing products in an environmentally responsible manner. NI recognizes that eliminating certain hazardous substances from our products is beneficial to the environment and to NI customers.

For additional environmental information, refer to the *Minimize Our Environmental Impact* web page at ni.com/environment. This page contains the environmental regulations and directives with which NI complies, as well as other environmental information not included in this document.

Waste Electrical and Electronic Equipment (WEEE)

£ (4)

EU Customers At the end of the product life cycle, all products *must* be sent to a WEEE recycling center. For more information about WEEE recycling centers, National Instruments WEEE initiatives, and compliance with WEEE Directive 2002/96/EC on Waste and Electronic Equipment, visit ni.com/environment/weee.

电子信息产品污染控制管理办法 (中国 RoHS)

中国客户 National Instruments 符合中国电子信息产品中限制使用某些有害物质指令 (RoHS)。关于 National Instruments 中国 RoHS 合规性信息,请登录 ni.com/ environment/rohs_china。(For information about China RoHS compliance, go to ni.com/environment/rohs_china.)

Worldwide Support and Services

The National Instruments website is your complete resource for technical support. At ni.com/ support you have access to everything from troubleshooting and application development self-help resources to email and phone assistance from NI Application Engineers.

Visit ni.com/services for NI Factory Installation Services, repairs, extended warranty, and other services.

Visit ni.com/register to register your National Instruments product. Product registration facilitates technical support and ensures that you receive important information updates from NI.

A Declaration of Conformity (DoC) is our claim of compliance with the Council of the European Communities using the manufacturer's declaration of conformity. This system affords the user protection for electromagnetic compatibility (EMC) and product safety. You can obtain the DoC for your product by visiting ni.com/certification. If your product supports calibration, you can obtain the calibration certificate for your product at ni.com/calibration.

National Instruments corporate headquarters is located at 11500 North Mopac Expressway, Austin, Texas, 78759-3504. National Instruments also has offices located around the world. For telephone support in the United States, create your service request at ni.com/support or dial 1 866 ASK MYNI (275 6964). For telephone support outside the United States, visit the Worldwide Offices section of ni.com/niglobal to access the branch office websites, which provide up-to-date contact information, support phone numbers, email addresses, and current events.

Refer to the *NI Trademarks and Logo Guidelines* at ni.com/trademarks for more information on National Instruments trademarks. Other product and company names mentioned herein are trademarks or trade names of their respective companies. For patents covering National Instruments products/technology, refer to the appropriate location: **Help>Patents** in your software, the patents.tr file on your media, or the National Instruments Patents Notice at ni.com/patents.You can find information about end-user license agreements (EULAs) and third-party legal notices in the readme file for your NI product. Refer to the *Export Compliance Information* at ni.com/legal/export-compliance for the National Instruments global trade compliance policy and how to obtain relevant HTS codes, ECCNs, and other import/export data. NI MAKES NO EXPRESS OR IMPLIED WARRANTIES AS TO THE ACCURACY OF THE INFORMATION CONTAINED HEREIN AND SHALL NOT BE LIABLE FOR ANY ERRORS. U.S. Government Customers: The data contained in this manual was developed at private expense and is subject to the applicable limited rights and restricted data rights as set forth in FAR 52.227-1014, and DFAR 252.227-1015.
