COMPREHENSIVE SERVICES

We offer competitive repair and calibration services, as well as easily accessible documentation and free downloadable resources.

SELL YOUR SURPLUS

We buy new, used, decommissioned, and surplus parts from every NI series. We work out the best solution to suit your individual needs. We Sell For Cash We Get Credit We Receive a Trade-In Deal

OBSOLETE NI HARDWARE IN STOCK & READY TO SHIP

We stock New, New Surplus, Refurbished, and Reconditioned NI Hardware.

APEX WAVES

Bridging the gap between the manufacturer and your legacy test system.

Board Assembly Part Number(s)

Part Number	Description
154213x-01L	MODULE ASSEMBLY, PXIE-5162, OEM
154772x-21L	MODULE ASSEMBLY, PXIE-5162, 2CH, 64MB
157772A-22L	MODULE ASSEMBLY, PXIE-5162, 2CH, 1GB
157772x-22L	MODULE ASSEMBLY, PXIE-5162, 2CH, 2GB
154772A-42L	MODULE ASSEMBLY, PXIE-5162, 4CH, 1GB
154772x-42L	MODULE ASSEMBLY, PXIE-5162, 4CH, 2GB
155377x-21L	MODULE ASSEMBLY, PXIE-5160, 2CH, 64 MB
155377x-22L	MODULE ASSEMBLY, PXIE-5160, 2CH, 2 GB
155377x-42L	MODULE ASSEMBLY, PXIE-5160, 4CH, 2 GB

Note: "x" includes all letter revisions unless otherwise specified

Manufacturer: National Instruments

Volatile Memory

<u>Type¹</u>	Size	User Accessible/ System Accessible ²	Battery Backup?	Purpose	Method of Clearing ³
Synchronous DRAM with 64 MB onboard option	64 MB	Yes/Yes	No	Stores Waveform Data	Cycle Power
Synchronous DRAM with 1 GB onboard option	1 GB	Yes/Yes	No	Stores Waveform Data	Cycle Power
Synchronous DRAM with 2 GB onboard option	2 GB	Yes/Yes	No	Stores Waveform Data	Cycle Power
FPGA Block RAM	288 KB	Yes/Yes	No	DRAM Buffers	Cycle Power

¹ Calibration constants that are stored in device EEPROMs include information for the device's full operating range. Calibration constants do not maintain any unique data for specific configurations at which the device is used unless otherwise specified.

² Items are designated **No** for the following reason(s):

a) Hardware changes or a unique software tool from National Instruments are required to modify contents of the memory listed.

b) Hardware-modifying software tools are not distributed to customers for any personal access or customization, also known as non-normal use.

³ The designation *None Available to User* indicates that the ability to clear this memory is not available to the user under normal operation. The utilities required to clear the memory are not distributed by National Instruments to customers for normal use.

Non-Volatile Memory

Туре	Size	User Accessible/ System Accessible	Battery Backup?	Purpose	Method of Clearing
EEPROM	32 KB	No/Yes	No	Device Configuration Calibration Constants	None available to user

Terms and Definitions

User Accessible Allows the user to directly write or modify the contents of the memory during normal instrument operation.

System Accessible Does not allow the user to access or modify the memory during normal instrument operation. However, system accessible memory may be accessed or modified by background processes. This can be something that is not deliberate by the user and can be a background driver implementation, such as storing application information in RAM to increase speed of use.

Cycle Power The process of completely removing power from the device and its components. This process includes a complete shutdown of the PC and/or chassis containing the device; a reboot is not sufficient for the completion of this process.

Volatile Memory Requires power to maintain the stored information. When power is removed from this memory, its contents are lost.

Non-Volatile Retains its contents when power is removed. This type of memory typically contains calibration or chip configuration information, such as power up states.
