COMPREHENSIVE SERVICES

We offer competitive repair and calibration services, as well as easily accessible documentation and free downloadable resources.

SELL YOUR SURPLUS

We buy new, used, decommissioned, and surplus parts from every NI series. We work out the best solution to suit your individual needs.

Sell For Cash Get Credit Receive a Trade-In Deal

OBSOLETE NI HARDWARE IN STOCK & READY TO SHIP

We stock New, New Surplus, Refurbished, and Reconditioned NI Hardware.

Bridging the gap between the manufacturer and your legacy test system.

PXIe-5442

NI PXIe-5442 Specifications

16-Bit 100 MS/s Arbitrary Waveform Generator with Onboard Signal Processing (OSP)

このドキュメントには、日本語ページも含まれています。

Unless otherwise noted, the following conditions were used for each specification:

- Analog filter enabled.
- Digital-to-analog converter (DAC) interpolation set to maximum allowed factor for a given sample rate.
- Signals terminated with 50 Ω .
- Direct path set to 1 Vpk-pk, Main path set to 2 V_{pk-pk}.
- Sample clock set to 100 MSamples/s.

Specifications describe the warranted, traceable product performance over ambient temperature ranges of 0 °C to 55 °C, unless otherwise noted.

Typical values describe useful product performance beyond specifications that are not covered by warranty and do not include guardbands for measurement uncertainty or drift. Typical values may not be verified on all units shipped from the factory. Unless otherwise noted, typical values cover the expected performance of units over ambient temperature ranges of 23 ± 5 °C with a 90% confidence level, based on measurements taken during development or production.

Nominal values (or supplemental information) describe additional information about the product that may be useful, including expected performance that is not covered under Specifications or Typical values. Nominal values are not covered by warranty.

Specifications are subject to change without notice. For the most recent NI 5442 specifications, visit ni.com/manuals. To access all the NI 5442 documentation, navigate to **Start»All Programs»National Instruments»NI-FGEN»Documentation**.

Caution The protection provided by this product may be impaired if it is used in a manner not described in this document.

Hot Surface If the NI 5442 has been in use, it may exceed safe handling temperatures and cause burns. Allow the NI 5442 to cool before removing it from the chassis.

PXI Star Trigger [†]	-115	-118	-130	<3.0 ps rms			
External Sample Clock Input Jitter Tolerance	Cycle-c	All values are typical.					

^{*} High-Resolution specifications improve as the sample rate is decreased.

Exported Sample Clock Destination Characteristics

Exported	Characteristic			Exported Sample clocks can be divided by integer <i>K</i>
Sample Clock Destinations	Maximum Frequency	Jitter (Typical)	Duty Cycle	$(1 \le K \le 4,194,304).$
PFI <01> (SMB front panel connectors)	105 MHz	PFI 0: 6 ps rms PFI 1: 12 ps rms	25 to 65%	
PXI_Trig<06> (backplane connector)	20 MHz	_	_	

Note Sample clock purity can significantly affect the performance of an NI PXIe-5442. High amounts of jitter or phase noise in the Sample clock can create spurs in the signal generator spectrum that are not present when using a pure Sample clock. For example, if you set the Clock Mode property or the NIFGEN_ATTR_CLOCK_MODE attribute is set to automatic, NI-FGEN often selects

[†] PXI star trigger specification is valid when the Sample clock source is locked to PXI CLK10.

High-Resolution clocking to achieve a specific IQ rate. High-Resolution clocking has more jitter than Divide-By-N clocking and may create extra spurs in the signal generator output spectrum (refer to Figures 9 through 12 for examples of this phenomenon). To remove extra spurs without using software resampling, you can use a pure external clock. The NI PXI-5650/5651/5652 frequency source, with low jitter and < 1Hz frequency resolution, is an excellent option.

Onboard Clock (Internal VCXO)

Specification	Value	Comments
Clock Source	Internal Sample clocks can either be locked to a Reference clock using a phase-locked loop or be derived from the onboard voltage-controlled crystal oscillator (VCXO) frequency reference.	1
Frequency Accuracy	±25 ppm	

Phase-Locked Loop (PLL) Reference Clock

Specification	Value	Comments
Sources	PXI_CLK10 (backplane connector) CLK IN (SMB front panel connector)	The PLL Reference clock provides the reference frequency for the PLL.
Frequency Accuracy	When using the PLL, the frequency accuracy of the NI 5442 is solely dependent on the frequency accuracy of the PLL Reference clock source.	_
Lock Time	Typical: 70 ms Maximum: 200 ms	All values are typical.
Frequency Range	5 to 20 MHz in increments of 1 MHz. Default of 10 MHz.	_
	The PLL Reference clock frequency must be accurate to ±50 ppm.	

Specification	Value	Comments
Duty Cycle Range	40 to 60%	_
Exported PLL Reference Clock Destinations	 PFI <01> (SMB front panel connectors) PXI_Trig<06> (backplane connector) 	I

Prefilter Gain a	Prefilter Gain and Offset				
Prefilter Gain and Offset Resolution	18 bits	_			
Prefilter Gain Range	-2.0 to +2.0 (Values < 1 attenuate use	Unitless			
Prefilter Offset Range	-1.0 to +1.0	Applied after Prefilter gain			
Output	Output = (User data \times Prooffset(-1 \le output \le +1)	Prefilter output			

Specification	Value			Comments
Finite Impulse Resp	oonse (FIR) Filter	r Types		
Туре	Parameter	Minimum	Maximum	
Flat	Passband	0.4	0.4	Lowpass filter that minimizes ripple to IQ rate × Passband.
Raised Cosine	Alpha	0.1	0.4	These filters can
Root Raised Cosine	Alpha	0.1	0.4	only be used with an OSP interpolation factor of 12 or greater.

Specification	Value	Comments
Numerically Contro	olled Oscillator (NCO)	
Frequency Range	1 mHz to (0.43 × sample rate)	_
Frequency Resolution	Sample rate / 2 ⁴⁸	Example: 355 nHz with a sample rate of 100 MS/s
I and Q Phase Resolution	0.0055°	_
Phase Quantization	17 bits	Look-up table address width
Tuning Speed	1 ms	_

Specification	Value		Comments	
IF Modulation Performance (Typical)				
Modulation Configuration	Measurement Type	Value	Direct path (4 dBm peak),	
GSM Physical Layer*	MER (Modulation Error Ratio)	56 dB	25 MHz carrier	
	EVM (Error Vector Magnitude)	<0.2% rms		
W-CDMA	MER	48 dB	1	
Physical Layer [†]	EVM	<0.4% rms	1	
DVB Physical	MER	44 dB]	
Layer [‡]	EVM	<0.5% rms		
20 MSymbols/s	MER	39 dB	1	
64 QAM**	EVM	<0.8% rms	1	
26.09 MSymbols/s	MER	36 dB	1	
64 QAM**	EVM	<1.0% rms	1	
34.78 MSymbols/s	MER	32 dB]	
64 QAM**	EVM	<1.6% rms]	

^{*} OSP Enabled. IQ Rate = 1.083 MS/s, 4 Samples/Symbol. FIR Filter Type = Flat, Passband = 0.4, Prefilter Gain = 0.4. MSK modulation. Software Pulse Shaping and Phase Accumulation, 270.833 kS/s, Gaussian, BT = 0.3. PN Sequence Order = 11.

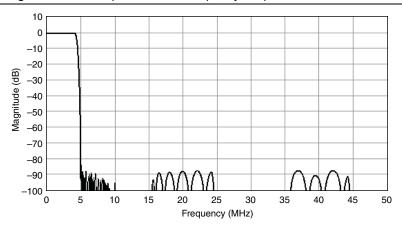

[†] OSP Enabled. IQ Rate = 3.84 MS/s, 1 Sample/Symbol. FIR Filter Type = Root-Raised Cosine, Alpha = 0.22, Prefilter Gain = 0.35. QPSK modulation. PN Sequence Order = 12.

[‡] OSP Enabled. IQ Rate = 6.92 MS/s, 1 Sample/Symbol. FIR Filter Type = Root-Raised Cosine, Alpha = 0.15, Prefilter Gain = 0.4. 32 QAM modulation. PN Sequence Order = 12.

^{**} OSP Enabled. IQ Rate = 50 MS/s. FIR Filter Type = Flat, Passband=0.4, Prefilter Gain = 0.6. 64 QAM modulation. Software Pulse Shaping and Resampling, Root-Raised Cosine, Alpha = 0.15. PN Sequence Order = 15.

Specification	Value	Comments
Digital Performance		
Maximum NCO Spur	<-90 dBc	Full-scale output
Interpolating Flat Filter Passband Ripple	<0.1 dB	Passband from 0 to $(0.4 \times IQ \text{ rate})$
Interpolating Flat Filter out of Band Suppression	>80 dB	Stopband suppression from (0.6 × IQ rate)

Figure 8. Real Interpolation Filter Frequency Response IQ Rate = 10 MS/s

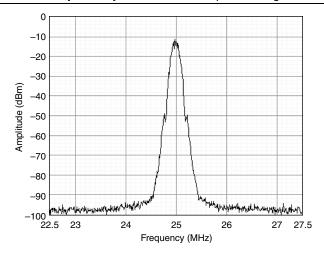

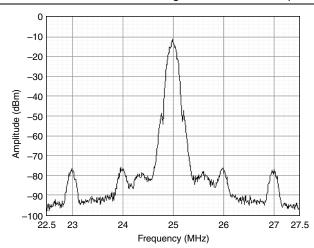

Figure 10. GSM Physical Layer 1, 2 Internal (High-Resolution) Sample Clocking = 99.665 MHz Additional Artifacts are due to High-Resolution Clock Spurs.

OSP Enabled. Direct Path (4 dBm peak). 25 MHz Carrier. IQ Rate = 1.083 MS/s, 4 samples/symbol. FIR Filter Type = Flat, Passband = 0.4. Software MSK modulation: 270.833 kS/s, Gaussian, BT = 0.3. PN Sequence Order = 14.

² For more information about eliminating spurs, refer to the *Note* in the *Sample Clock* section.

Figure 11. DVB Physical Layer^{1, 2} External Sample Clocking = 96.88 MHz

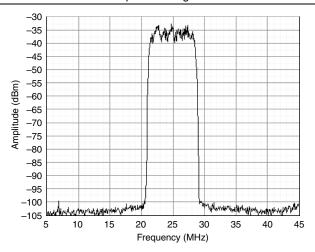

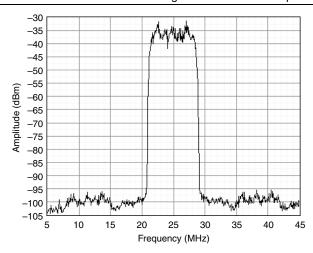

Figure 12. DVB Physical Layer^{1, 2} Internal (High-Resolution) Sample Clocking = 96.88 MHz Additional Artifacts are due to High-Resolution Clock Spurs.

¹ OSP Enabled. Direct Path (4 dBm peak). 25 MHz Carrier. IQ Rate = 6.92 MS/s, 1 sample/symbol. FIR Filter Type = Root- Raised Cosine, Alpha = 0.15. 32 QAM modulation. PN Sequence Order = 15.

² For more information about eliminating spurs, refer to the *Note* in the *Sample Clock* section.

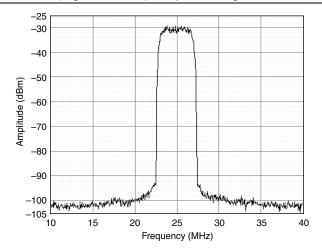

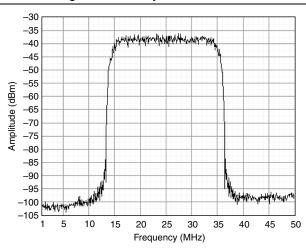

Figure 14. 20 MSymbols/s 64 QAM²

¹ OSP Enabled. Direct Path (4 dBm peak). 25 MHz Carrier. IQ Rate = 3.84 MS/s, 1 Sample/Symbol. FIR Filter Type = Root-Raised Cosine, Alpha = 0.22. QPSK modulation. PN Sequence Order = 15.

OSP Enabled. Direct Path (4 dBm peak). 25 MHz Carrier. IQ Rate = 50 MHz. FIR Filter Type = Flat Passband = 0.4. Software 64 QAM modulation. Root-Raised Cosine Alpha = 0.15. PN Sequence Order = 15.

Specification	Value	Comments
Self-Calibration	An onboard, 24-bit ADC and precision voltage reference are used to calibrate the DC gain and offset. The self-calibration is initiated by the user through the software and takes approximately 75 seconds to complete.	_
External Calibration	The external calibration calibrates the VCXO, voltage reference, output impedance, DC gain, and offset. Appropriate constants are stored in nonvolatile memory.	_
Calibration Interval	Specifications valid within 2 years of external calibration.	_
Warm-up Time	15 minutes	_

Power

Specification	Typical	Maximum	Comments
+3.3 VDC	1.67 A	2.0 A	_
+12 VDC	1.9 A	2.2 A	
Total Power	28.3 W	33 W	

Software

Specification	Value	Comments
Driver Software	NI-FGEN is an IVI-compliant driver that allows you to configure, control, and calibrate the NI 5442. NI-FGEN provides application programming interfaces for many development environments.	_
Application Software	NI-FGEN provides programming interfaces for the following application development environments: • LabVIEW • LabWindows™/CVI™ • Measurement Studio • Microsoft Visual C++ .NET • Microsoft Visual C/C++ • Microsoft Visual Basic	
Interactive Control and Configuration Software	The FGEN Soft Front Panel supports interactive control of the NI 5442. The FGEN Soft Front Panel is included on the NI-FGEN driver CDs. Measurement & Automation Explorer (MAX) provides interactive configuration and test tools for the NI 5442. MAX is also included on the NI-FGEN CDs. You can use the NI 5442 with NI SignalExpress.	

Physical

Specification	Value	Comments
Dimensions	3U, One Slot, PXI Express module 21.6 cm × 2.0 cm × 13.0 cm (8.5 in. × 0.8 in. × 5.1 in.)	_
Weight	405 g (14.3 oz)	_

Specification	Value		Comments
Front Panel Connectors			
Label	Function(s)	Connector Type	_
CH 0	Analog output	SMB (jack)	
CLK IN	Sample clock input and PLL reference clock input	SMB (jack)	
PFI 0	Marker output, trigger input, Sample clock output, exported trigger output, and PLL Reference clock output	SMB (jack)	
PFI 1	Marker output, trigger input, Sample clock output, exported trigger output, and PLL Reference clock output	SMB (jack)	
Front Panel LED	Indicators		
Label	Function		For more
ACCESS	The ACCESS LED indicates the status of the PCI bus and the interface from the NI 5442 to the controller.		information, refer to the NI Signal Generators Help.
ACTIVE	The ACTIVE LED indicates the status of the onboard generation hardware of the NI 5442.		
Included Cable			
	1 (NI part number 763541-01), 50 Ω , BNC Male to SMB Plug, RG223/U, Double Shielded, 1 m cable.		_

NI PXIe-5442 Environment

Note To ensure that the NI 5442 cools effectively, follow the guidelines in the Maintain Forced-Air Cooling Note to Users included in the NI 5442 kit.

Specification	Value	Comments
Operating Temperature	0 °C to +55 °C in all PXI Express chassis produced by NI.	_
	Meets IEC 60068-2-1 and IEC 60068-2-2.	
	Note: Refer to KnowledgeBase 4AEB2ML1 at ni.com/support for more information about maximizing PXIe data transfer rates when operating at ambient temperatures below 10 °C.	
Storage Temperature	-25 °C to +85 °C. Meets IEC 60068-2-1 and IEC 60068-2-2.	_
Operating Relative Humidity	10% to 90%, noncondensing. Meets IEC 60068-2-56.	_
Storage Relative Humidity	5% to 95%, noncondensing. Meets IEC 60068-2-56.	_
Operating Shock	30 g, half-sine, 11 ms pulse. Meets IEC 60068-2-27. Test profile developed in accordance with MIL-PRF-28800F.	Spectral and jitter specifications could degrade.
Storage Shock	50 g, half-sine, 11 ms pulse. Meets IEC 60068-2-27. Test profile developed in accordance with MIL-PRF-28800F.	_
Operating Vibration	5 Hz to 500 Hz, 0.31 g _{rms} . Meets IEC 60068-2-64.	Spectral and jitter specifications could degrade.
Storage Vibration	5 Hz to 500 Hz, 2.46 g _{rms} . Meets IEC 60068-2-64. Test profile exceeds requirements of MIL-PRF-28800F, Class B.	_
Altitude	2,000 meter maximum (at 25 °C ambient temperature)	_
Pollution Degree	2	_
Indoor use only.		

Compliance and Certifications

Safety

This product meets the requirements of the following standards of safety for electrical equipment for measurement, control, and laboratory use:

- IEC 61010-1, EN 61010-1
- UL 61010-1, CSA 61010-1

Note For UL and other safety certifications, refer to the product label or the *Online* Product Certification section.

Electromagnetic Compatibility (EMC)

This product meets the requirements of the following EMC standards for electrical equipment for measurement, control, and laboratory use:

- EN 61326-1 (IEC 61326-1): Class A emissions, Basic immunity
- EN 55011 (CISPR 11): Group 1, Class A emissions
- AS/NZS CISPR 11: Group 1, Class A emissions
- FCC 47 CFR Part 15B: Class A emissions
- ICES-001: Class A emissions

Note In the United States (per FCC 47 CFR), Class A equipment is intended for use in commercial, light-industrial, and heavy-industrial locations. In Europe, Canada, Australia, and New Zealand (per CISPR 11), Class A equipment is intended for use only in heavy-industrial locations.

Note Group 1 equipment (per CISPR 11) is any industrial, scientific, or medical equipment that does not intentionally generate radio frequency energy for the treatment of material or inspection/analysis purposes.

Note For the standards applied to assess the EMC of this product, refer to the Online Product Certification section.

CE Compliance (E

This product meets the essential requirements of applicable European Directives as follows:

- 2014/35/EU; Low-Voltage Directive (safety)
- 2014/30/EU; Electromagnetic Compatibility Directive (EMC)

Online Product Certification

Refer to the product Declaration of Conformity (DoC) for additional regulatory compliance information. To obtain product certifications and the DoC for this product, visit ni.com/ certification, search by model number or product line, and click the appropriate link in the Certification column.

Environmental Management

NI is committed to designing and manufacturing products in an environmentally responsible manner. NI recognizes that eliminating certain hazardous substances from our products is beneficial to the environment and to NI customers.

For additional environmental information, refer to the *Minimize Our Environmental Impact* web page at ni.com/environment. This page contains the environmental regulations and directives with which NI complies, as well as other environmental information not included in this document.

Waste Electrical and Electronic Equipment (WEEE)

EU Customers At the end of the product life cycle, all products *must* be sent to a WEEE recycling center. For more information about WEEE recycling centers. National Instruments WEEE initiatives, and compliance with WEEE Directive 2002/96/EC on Waste and Electronic Equipment, visit ni.com/environment/ weee.

电子信息产品污染控制管理办法 (中国 RoHS)

中国客户 National Instruments 符合中国电子信息产品中限制使用某些有害物质指令 (RoHS)。关于 National Instruments 中国 RoHS 合规性信息,请登录 ni.com/ environment/rohs china. (For information about China RoHS compliance, go to ni.com/environment/rohs_china.)

Worldwide Support and Services

The National Instruments website is your complete resource for technical support. At ni.com/support you have access to everything from troubleshooting and application development self-help resources to email and phone assistance from NI Application Engineers.

Visit ni.com/services for NI Factory Installation Services, repairs, extended warranty, and other services.

Visit ni.com/register to register your National Instruments product. Product registration facilitates technical support and ensures that you receive important information updates from NI.

A Declaration of Conformity (DoC) is our claim of compliance with the Council of the European Communities using the manufacturer's declaration of conformity. This system affords the user protection for electromagnetic compatibility (EMC) and product safety. You can obtain the DoC for your product by visiting ni.com/certification. If your product supports calibration, you can obtain the calibration certificate for your product at ni.com/calibration.

National Instruments corporate headquarters is located at 11500 North Mopac Expressway, Austin, Texas, 78759-3504. National Instruments also has offices located around the world. For telephone support in the United States, create your service request at ni.com/support or dial 1 866 ASK MYNI (275 6964). For telephone support outside the United States, visit the Worldwide Offices section of ni.com/niglobal to access the branch office websites, which provide up-to-date contact information, support phone numbers, email addresses, and current events.

Refer to the NI Trademarks and Logo Guidelines at ni.com/trademarks for more information on National Instruments trademarks. Other product and company names mentioned herein are trademarks or trade names of their respective companies. For patents covering National Instruments products/technology, refer to the appropriate location: Help-Patents in your software, the patents.txt file on your media, or the National Instruments Patents Notice at ni.com/patents.You can find information about end-user license agreements (EULAs) and third-party legal notices in the readme file for your NI product. Refer to the Export Compliance Information at ni.com/legal/export-compliance for the National Instruments global trade compliance policy and how to obtain relevant HTS codes, ECCNs, and other import/export data. NI MAKES NO EXPRESS OR IMPLIED WARRANTIES AS TO THE ACCURACY OF THE INFORMATION CONTAINED HEREIN AND SHALL NOT BE LIABLE FOR ANY ERRORS. U.S. Government Customers: The data contained in this manual was developed at private expense and is subject to the applicable limited rights and restricted data rights as set forth in FAR 52.227-14, DFAR 252.227-7014, and DFAR 252.227-7015.
